Following the publication of the original article (Pearce et al., 2021) the authors noticed that there are still issues of concern with the publication. The following were flagged by the authors at the proof stage that have still not been addressed.

- There are multiple, repeated references for ‘United Nations Office on Drugs and Crime’ in the reference list.
- These include:
 - (2 instances) United Nations Office on Drugs and Crime (UNODC). (2015). The United Nations Standard Minimum Rules for the Treatment of Prisoners (the Nelson Mandela Rules). Retrieved from https://www.unodc.org/documents/justice-and-prison-reform/Nelson_Mandela_Rules-E-ebook.pdf
 - (2 instances) United Nations Office on Drugs and Crime (UNODC). (2020). COVID-19 prevention and control among people working in prison

- In the reference list, ‘Retrieved from’ still remains in many instances where there is no URL; we had asked for these to be removed prior to publication.
- Supplementary appendix 1 is the version submitted with tracked changes (highlights), formatting as requested in the review process. These highlights should have been removed in the publication process, once approved by reviewers.

The original article (Pearce et al., 2021) has been updated.
